Fixing and Wiring

Instructions

1. Make sure that the electrical circuit is Isolated (master switch off)
2. Install the backing plate securely, ensuring to seal around this plate to avoid moisture penetration. Seal all holes in the backing plate including cable entry and screw holes. Failure to do so will void warranty.
3. Connect the cable 240v models, (use wire with earth); connect the Yellow/Green (earth) first, the Brown (live) second and then Blue (neutral) last. (as shown above)
4. Screw the mounting plate to the desired location keeping in mind the placement of the wiring.
5. Affix the ceiling or wall light to the mounting plate using the grub screws provided.
6. Open the cover to insert lamp and affix the appropriate LED.
7. All connections must be carried out carefully, inspect all contacts before switching back on the electric circuit (master switch on) .

Disclaimer

This product must be installed by a skilled or instructed person in accordance with the current edition of the IET Wiring Regulations BS 7671 "Requirements for Electrical Installations" and the Buildings Regulations, as may be applicable subject to the location and country of the installation.

Should this product be modified, misused or not installed as per the instructions given, the product warranty shall be rendered void.

All information contained within these installation instructions manual is provided in good faith. Orlight shall not be held responsible for any losses incurred as a result of the Customer's failure to follow the instructions manual thoroughly and in its entirety or failing to inspect the product for missing parts and/or any defects prior to installation.
