

Instructions

Step 1: Ensure the electrical circuit is safely isolated before starting any work. Remove the screws.

Step 2: Hold the back plate against the wall in the desired position. Mark the fixing points, then drill the appropriate holes to accommodate the rawlplugs.

Step 3: Pass the supply wiring through the opening in the back plate. Position the fixture on the wall, align it with the drilled holes, insert the rawlplugs, and secure the back plate. Connect the wiring in accordance with electrical regulations.

Step 4: Insert the lamps into their holders and ensure they are firmly seated.

Step 5: Position the diffuser over the fixture and slide it back into place.

Step 6: Replace the screws removed earlier and tighten them to secure the diffuser.

We recommend that this product is installed by a competent person in accordance with the latest edition of the IET Wiring Regulations BS 7671 "Requirements for Electrical Installations" and the Buildings Regulations, as may be applicable subject to the location and country of the job or installation.
