Instructions

This product must be installed by a skilled or instructed person in accordance with the current edition of the IET Wiring Regulations BS 7671 "Requirements for Electrical Installations" and the Building Regulations, as may be applicable subject to the location and country of the installation.

Disconnect the mains supply before installation. Ensure that the unit is installed and maintained by a certified professional and that installation conforms to any local building control standard applicable.

All information contained within these installation instructions manual is provided in good faith. Orlight shall not be held responsible for any losses incurred as a result of the Customer's failure to follow the instructions manual thoroughly and in its entirety or failing to inspect the product for missing parts and/or any defects prior to installation.

Step 1: Mark surface area and create desired cut-out.

Step 2: Remove the gear tray using the pull sheet.

Step 3: Feed mains supply through cable entry and connect to terminal block.

Step 4: Insert fitting into cut-out. Affix to the appropriate position by tightening back screws from inside the fitting.

Instructions Continue

Step 5: Raise the assembled profile to the ceiling or mounting surface and position it correctly.

Step 6: Tighten the screw to firmly secure the profile in place.

Step 7: Attach the gear tray and connect the safety wire securely.

Step 8: Inspect fitting connections and all contacts, and remove the pull sheets.

Step 9: Click the gear tray into place. Lift the assembled component and push into the mounted profile.

Step 10: Ensure all components are secure and the installation is fully completed.
