Installation

Step 1: Unscrew the pre-installed screws

Before installation, locate the pre-installed screws in the main body. Using a suitable screwdriver, carefully unscrew and remove them completely. Keep all screws safe, as they will be required in the following steps.

Step 2: Fit the wall fixings

Position the bracket/plate as shown, aligning it with the pre-drilled side holes. Insert the screws into the side holes and tighten them evenly. Do not fully over-tighten yet—leave a tiny amount of play so the next part aligns easily.

Step 3: Attach the mounting plate to the main body

Position A on B, lining up the holes in the plate with the threaded holes in the main body. Insert the two screws from the top (as indicated by the dashed lines). Tighten both screws until the plate sits flush and secure.

Installation Continued

Step 4: Final check

Ensure all screws are fully tightened and the plate/bracket is straight. Check the assembly is stable with no movement, and that all components are aligned exactly as shown in Step 4.

Disclaimer

This product must be installed by a skilled or instructed person in accordance with the current edition of the IET Wiring Regulations BS 7671 "Requirements for Electrical Installations" and the Buildings Regulations, as may be applicable subject to the location and country of the installation.

Should this product be modified, misused or not installed as per the instructions given, the product warranty shall be rendered void.

All information contained within these installation instructions manual is provided in good faith. Orlight shall not be held responsible for any losses incurred as a result of the Customer's failure to follow the instructions manual thoroughly and in its entirety or failing to inspect the product for missing parts and/or any defects prior to installation.
