Cross headed screwdriver

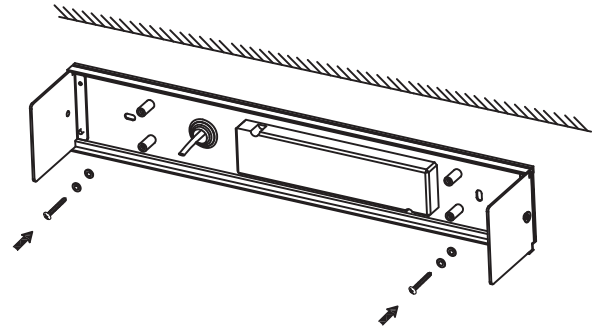

MONTAR-MINI

Installation Instructions

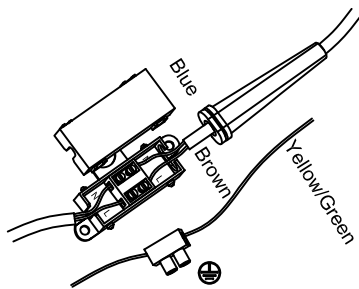

3. Installation Steps

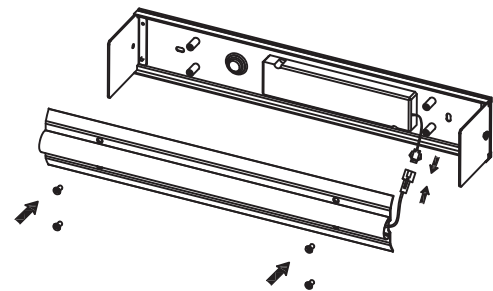

- [1]
Making sure that the power source is still accessible, drill the surface to fit the wall light, using the metal bracket to locate the holes position

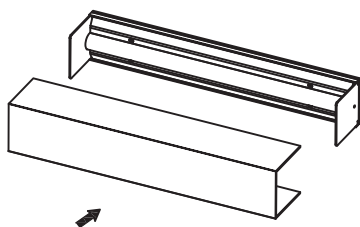

- [2]
Screw the metal bracket onto the wall using the selftapping screws and raw plugs if necessary

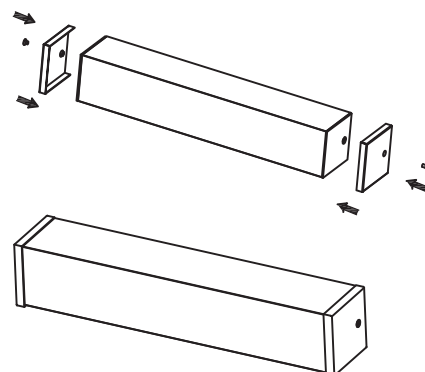

- [3]
Use the connector lock to connect the mains power supply as shown

- [4]
Connect the driver and the LED part. Use the screws to fix the LED part.

- [5]
Push the shade to cover the bracket

- [6]
Fix the end caps to two ends of the lamp. Your lamp is now ready to use.
